

Hygie innovates again, launching new products for outdoor and travel hygiene in the CAA-Quebec stores.

Hygie, recognized leader in hospital for specialty products limiting the spread of bacteria, is proud to join forces with CAA-Québec to offer consumers a new range of products. This association is a nice complement to Hygie since CAA-Québec seeks to ensure safety and peace of mind to each of its members and clients, by offering services and products of very high quality in several areas such as travelling.

For car rides with the kids, hiking, trekking, camping in national parks, or long backpacking journeys into the unknown—no matter what your adventure, the right product can add comfort to these memorable moments. Our new line includes the Pre-moistened Wash Glove, which requires no water for quick and thorough cleansing—even in the middle of the woods. The GO PEE Urinal Kit includes a support and urinal bags with absorbent pads, so men and women can pee no matter where they are without any mess. GO VOM, a disposable bag with absorbent pad, is ideal for managing motion sickness in cars, planes or boats. These new products are simple to use and can help you avoid unpleasant situations, making your life easier!

"We are very proud to launch these new products. The dedicated work, research and innovation that went into the development of this new line has made it possible for us to offer our customers hygiene solutions specifically tailored to travel and the outdoors. With these new products, we hope to provide our customers with the same efficiency and ease of use that Hygie and our health care products are known for!" explains Hygie President, Eric Tanguay.

About Hygie®

Founded in 2006, Hygie® is an innovative company that develops, manufactures and markets specialty products that effectively limit the spread of bacteria, reducing the risk of hospital infections. Already well established in Canada in over 700 health facilities, as well as in home care settings, the company now offers a full line of products for outdoor and travel hygiene. Hygie offers a wide range of innovative hygiene products to meet the specific needs of our customers and to make their lives easier. Setting Hygie apart from the competition is the patented HY21® technology, which consists of hygienic containers and liners to help manage the biological fluids that contribute to the problem of hospital infections. The Quebec company holds patents in 38 countries and is currently expanding into the United States and Mexico.
