

It's finally time to start planning your summer vacation! In addition to booking your favourite campsite or hotel, make sure you have all you need to avoid unpleasant situations. Hygie, a well-known supplier of infection-fighting products in hospital environments throughout Canada and the United States, has just launched a brand new line of outdoors and travel solutions. Alleluia!

The new line includes a pre-moistened wash glove that enables quick and thorough cleaning without water – even in the middle of the woods. And with *GO PEE*, a urinal kit that provides a hygienic support and a bagd with an absorbent pad, you can answer nature's call, wherever you are. An ideal solution for quick fixes when travelling with kids or spending the night in a tent. And let's not forget *GO VOM*, a disposable bag with absorbent padding that can be used in case of motion sickness in cars, planes and boats.

These new products can help kids and adults avoid unpleasant situations. Their ease of use will make your life so much easier!

Available online at www.hygie.com and at CAA-Québec stores.
